PROFILE SUMMARY

Strategic SAP Security and GRC professional with over 7 years in architecting secure enterprise landscapes. Proven track record in managing large-scale global projects across India, Canada, and the UK, leading end-to-end S/4HANA transformations, GRC 12.0 implementations, and BTP cloud security governance. Expert in designing scalable, audit-ready authorization models, enterprise role governance frameworks, and SoD-compliant access controls aligned with business and compliance requirements. Skilled in SAP Security automation concepts, AI/Python-driven operational optimization, cross-system risk analysis, and secure cloud authorization administration.

WORK EXPERIENCE

Deloitte Touché Tohmastu India LLP

Deputy Manager-Technology & Transformation - ET&P - SAP

Bengaluru, Karnataka

Oct 2022 - Present

SAP S/4HANA Security & Role Governance:

- Leading SAP S/4HANA role design activities for new L1-L4 business requirements aligned with enterprise security and compliance standards.
- Designed and implemented task-based roles and business roles for SAP S/4HANA environments aligned with organizational role governance models and SoD compliance requirements.
- Developed scalable authorization governance frameworks including role matrices, naming conventions, authorization standards, and enterprise role design principles.
- Designed and built SAP business roles, derived roles, Fiori catalogs, spaces, and pages for SAP S/4HANA landscapes.
- Conducted proactive analysis of existing system SoD risks and identified potential impact areas on new authorization designs, enabling secure and compliant role architecture decisions.
- Advised business and functional stakeholders on required system and process changes to mitigate segregation-of-duties conflicts and reduce security/compliance risks.
- Reduced authorization defect leakage during SIT/UAT cycles.
- Collaborated with business process owners, functional consultants, ABAP developers, Basis teams, and technical stakeholders to implement secure and scalable authorization solutions.

SAP Fiori & Technical Security Administration:

- Performed SAP Fiori authorization troubleshooting using SU53, STAUTHTRACE, /IWFND/ERROR.LOG, /IWBEP/ERROR.LOG, browser console analysis, and backend authorization trace tools.
- Managed activation and maintenance of OData services, SICF nodes, and Fiori authorization objects.
- Supported custom security build requirements and authorization enhancements for enterprise SAP applications.
- Coordinated with technical and functional teams for issue resolution during implementation and testing phases.

SAP GRC Access Control:

- Delivered end-to-end SAP GRC Access Control implementations covering ARA, ARM, EAM, BRM, UAR, and RM modules.
- Designed and maintained SAP GRC SoD rulesets including risks, functions, mitigation controls, and risk remediation processes.
- Supported SAP GRC ruleset design, risk/function maintenance, mitigation control alignment, and ruleset optimization activities.
- Configured and enhanced Firefighter (FF) Log Review workflows involving MSMF workflow customization and approval process enhancement.
- Performed cross-system risk analysis and provisioning integration for SAP S/4HANA, SAP ECP, and SAP SuccessFactors.
- Conducted production SoD analysis using Deloitte ACTT tools to identify and remediate high-risk access conflicts.
- Collaborated for PoC of a Python-based automation for SAP GRC access request creation.

SAP Build Work Zone & SAP BTP Administration:

- Managed SAP Build Work Zone role exposure and authorization integration with SAP BTP security architecture.
- Administered SAP BTP Role Collections, IAS Group Mapping, and user-to-role assignment processes for cloud identity governance.
- Performed user administration and authorization governance activities across SAP BTP and SAP S/4HANA landscapes.

Testing, Governance & Delivery Support:

- Prepared security and functional test scripts for SIT, TUT/UAT, and regression testing activities.
- Supported SIT and TUT/UAT testing cycles by analyzing defects, troubleshooting authorization issues, and coordinating remediation activities.
- Facilitated workshops with business, functional, and technical teams for security requirement gathering and authorization governance discussions.
- Supported multiple SAP S/4HANA landscapes including Development, QA, Pre-Production, and Production systems.
- Delivered SAP Security and SAP GRC knowledge transfer sessions and internal training programs.

➤ **Worked for Geographic Location:** India, Canada

Environment: SAP GRC AC 12.0, SAP S/4HANA, SAP ECC, SAP Fiori, SAP Build Work Zone, SAP BTP, SAP SuccessFactors, SAP ECP

SAP Security Administration:

- Designed and maintained SAP PFCG roles for ECC, ISU, CRM, C4C, BW, and Fiori applications based on business requirements.
- Managed user administration activities including role assignment, profile maintenance, authorization analysis, and access provisioning.
- Performed authorization troubleshooting using SU53, ST01, STAUTHTRACE, SUIM, and SLG1.
- Supported SAP CUA and non-CUA environments across enterprise SAP landscapes.
- Automated repetitive SAP Security activities using SECATT scripts for password reset, role assignment, and access maintenance.
- Supported SAP OSS activities including developer key and object access management.
- Performed periodic SAP housekeeping and audit support activities.

SAP GRC Access Control

- Supported SAP GRC ARA, ARM, and EAM modules.
- Conducted SoD risk analysis during role design and user provisioning activities.
- Supported audit reporting, user access review, and compliance-related activities.

SAP BW & BOBJ Security:

- Built and maintained SAP BW Analysis Authorizations using RSECADMIN.
- Managed SAP BusinessObjects user administration and authorization assignments.

Project & Governance Contributions:

- Supported SAP migration and transformation initiatives from SAP Security and authorization perspectives.
- Performed SAP License Audit activities using SLAW2 and USMM.
- Conducted KT sessions and mentored new team members on SAP Security processes and project activities.
- Supported global stakeholders across the United Kingdom.

➤ **Worked for Geographic Location:** United Kingdom

Environment: SAP ECC 6.0, SAP ISU, SAP CRM, SAP C4C, SAP GRC 10.1/12.0, SAP BW, SAP Fiori

EDUCATION

International Institute of Information Technology

Bhubaneswar

Course: Bachelor of Technology, Computer Science and Engineering

August 2014-June 2018

- Cumulative GPA: 8.02

SPECIALIZATION

- Enterprise SAP Role Governance
- SAP S/4HANA Security Architecture
- SAP GRC Compliance & SoD Governance
- SAP Fiori Authorization Design
- Cross-System Risk Analysis
- SAP Cloud Authorization Administration
- Stakeholder & Workshop Management
- Security Testing & Defect Resolution
- Risk-Aware Authorization Design
- SAP Security Transformation Support

CERTIFICATIONS

SAP Certified Application Associate SAP Access Control 12

July 2022

SAP Certified - Positioning SAP Business AI Solutions as Part of SAP Business Suite

Dec 2025

INDUSTRY EXPERIENCE

- Energy & Utilities
- Consumer Products

ACHIEVEMENTS

Received multiple Recognition Awards at Deloitte for project delivery excellence and SAP Security contributions.

Received multiple Manager's Choice Awards at IBM for operational excellence and delivery support.

Received Spark Award at IBM for top project performance.
